

Aerospace Manufacturers Representative and Business Development Consulting Company

Thank you for considering Edge Consulting and Sales. Edge Consulting specializes in telemetry and data acquisition systems. We are telemetry experts, dedicated to making the selection and integration of individual components and related instrumentation easier for our customers. Our continued success is credited to our drive, eagerness to learn, educational backgrounds, and pre and post sales support.

We are Proud Members of Industry Associations

TELEMETRY	
 communications Telemetry & RF Products www.l-3com.com/tw www.l-3com.com/te	L-3 Telemetry & RF Products Telemetry & RF Products serves commercial, military and civilian customers with products that include TT&C satellite transponders, high data rate satellite transmitters, receivers, high-power amplifiers, encryption/ decryption units, video compression/decompression units, tactical intelligence radios, tactical HF/SSB and microwave radios, telemetry ground system components and solutions, specialized telemetry, surveillance, and network products.
 www.apogeelabs.com	Apogee Labs specializes in telemetry units applicable to Data Acquisition, Data Transport, Switching, Testing, and Signal Interfaces. Products include multiplexers, demultiplexers, encoders, digital matrix switches, data link and BER testing units, signal converters, and interface units.
 www.amergint.com	Amergint Technologies – Specializes in Satellite Ground and Test Systems, Satellite Signal and Data Processing, crypto mitigation, Network Architecture and Analysis, and hardware and software analysis and design. Products range from FEPS, T&C recorders, modems, Intelligent Test Environment for Signal Processing Systems, Software-Defined Signal and Protocol Processing, and Test Framework for Signal Processing Systems.
 www.meas-spec.com	Measurement Specialties - Global designer and manufacturer of sensors and sensor-based systems offering custom designs for OEM Applications. Global designer and manufacturer of sensors and sensor-based systems offering custom designs for OEM Applications. Long development cycles and high qualification costs require aerospace firms to identify stable, reliable, cost-effective partners.
 communications Cincinatti Electronics www.cinele.com	L-3 Cincinatti Electronics offers leadership in the design and production of innovative infrared sensors, hybrid microelectronics and cryogenics for autonomous guidance, situational awareness, threat warning and targeting. They also specialize in the design, development and production of avionics and communications products for missiles, launch vehicles, and spacecraft.
 www.thermacore.com	Thermacore specializes in the custom design, development and manufacturing of highly engineered thermal management systems and components for a variety markets that include Military and Aerospace.

EDGE Consulting is a next generation manufacturers' representative delivering exceptional solutions, enabling clients to excel in a competitive environment and achieve a rapid return on investment!

 <p>www.l-3com.com/brashear</p>	<p>L-3 Brashear consistently meets the rigorous challenges of the test range environment by creating durable, reliable systems that integrate precision optics; smooth, accurate positioning systems; and the latest target sensing and data recording techniques. Our tracking mounts and pedestals are reliable, highly accurate pointing systems that may be tailored to meet a wide range of customer missions.</p>
 <p>www.aim-online.com</p>	<p>AIM is a leading manufacturer of Avionics Test & Simulation Products for MIL-STD-1553, STANAG3910/ EFEX, ARINC429, AFDX/ ARINC664, PANAVIA Serial Link, Fibre Channel & MIL-STD-1760 applications. AIM builds its products on an innovative, field proven 'Common Core' hardware design providing consistency and compatibility across all modules and platforms.</p>
 <p>www.l-3com.com/nova</p>	<p>L3 Nova Engineering develops and manufactures state-of-the-art wireless data communication systems, including Hypermod demodulators supporting all enhanced waveforms, and frequency agile Hypermod transmitters supporting multiple waveforms designed for harsh environments.</p>
 <p>Aitech Defense Systems, Inc. Member of the A-Rugged Group</p> <p>www.rugged.com</p>	<p>Ai Tech - Aitech is a leading supplier of rugged computer systems optimized for harsh environments offering:</p> <ul style="list-style-type: none"> • VME and CompactPCI for defense and space applications • COTS, radiation tolerant and MIL-SPEC solutions • VMEbus and CompactPCI boards, enclosures and sub-systems • Hardware system integration
<h2 style="background-color: #0056b3; color: white; padding: 5px;">TIMING, SENSORS, and DATA ACQUISITION</h2>	
 <p>www.endruntechnologies.com</p>	<p>Endrun Technologies - Specializes in the design, manufacture, and sale of timing Network Time Servers, Time & Frequency Standards, and Distribution Amplifiers. These products are used in a variety of applications including computer networks, satellite ground stations, time and frequency distribution, radar system timing, and test range timing.</p>
 <p>www.griffithent.com</p>	<p>Griffith Enterprises is a leading high value added manufacturer of complex, specialized electrical interconnect harnesses, systems controls, and ground support equipment for Aerospace, military, and commercial customers.</p>
 <p>www.kamansensors.com</p>	<p>KAMAN Aerospace is the World's Leader in High-Performance Noncontact Position Sensors. Based on eddy current measurements, Kaman sensors are capable of stable and repeatable sub-nanometer resolution, and can operate in the most extreme temperature and pressure environments. Kaman has been in business for over 40 years and offers both off the shelf and custom solutions.</p>
 <p>www.gage-applied.com</p>	<p>GaGe's extensive line of products include ultra high speed data acquisition cards, digital oscilloscope cards, analog and digital signal generation cards, arbitrary waveform generator cards, digital pattern generation cards, digital input cards and software packages to create a user-friendly human interface.</p>
 <p>www.industcomputing.com</p>	<p>Industrial Computing, Inc. (ICI) is a 20-year-old, Massachusetts-based company providing a broad line of industrial and military computing and display products to systems integrators, the military, financial institutions, industrial control integrators, OEMs and end-users.</p>

*Edge Consulting does not represent all lines in all sales areas.

EDGE Consulting is a next generation manufacturers' representative delivering exceptional solutions, enabling clients to excel in a competitive environment and achieve a rapid return on investment!
